

# LABORATORY REPORT

SAMPLE / DEMONSTRATION DOCUMENT — NOT A REAL MEDICAL REPORT

|                  |                                                         |
|------------------|---------------------------------------------------------|
| Patient Name     | Abhijit Ashok Kokare                                    |
| Age / Sex        | 20 years / Male                                         |
| Date of Report   | 29 August 2026                                          |
| Clinical History | Fever for 2 days with headache, weakness and mild cough |

## Complete Blood Count (CBC)

| Test            | Result | Reference Range | Unit             |
|-----------------|--------|-----------------|------------------|
| Hemoglobin      | 14.2   | 13.0–17.0       | g/dL             |
| Total WBC Count | 8,900  | 4,000–11,000    | cells/ $\mu$ L   |
| Neutrophils     | 62     | 40–75           | %                |
| Lymphocytes     | 30     | 20–45           | %                |
| Platelets       | 2.45   | 1.50–4.50       | lakh/ $\mu$ L    |
| RBC Count       | 4.8    | 4.5–5.9         | million/ $\mu$ L |

## Inflammatory Marker

| Test                     | Result | Reference Range | Unit |
|--------------------------|--------|-----------------|------|
| C-Reactive Protein (CRP) | 6.2    | < 5.0           | mg/L |

## Vital Sign / Other Observation

|                  |                                                       |
|------------------|-------------------------------------------------------|
| Parameter        | Observation                                           |
| Body Temperature | 101°F (patient-reported)                              |
| Blood Pressure   | 120/78 mmHg                                           |
| Clinical Note    | Mild fever with headache, weakness and cough reported |

## Interpretation

This sample report is designed for testing the OCR/document-upload feature of an AI clinical case assistant. The example values are illustrative and should not be interpreted as an actual diagnostic laboratory result.
